

MORSPACE®

MORspace, the Affordable Green Solution

Ever wonder why green office furniture systems cost so much? So did we. Now you don't have to sacrifice green products and technology to meet your budget. MAiSPACE the innovator of affordably priced systems furniture presents MORspace. Framing is constructed from recycled steel, and acoustical tiles are produced with 100% post-consumer P.E.T. Patented, plug-and-play voice, data and power cabling systems can be reused rather than ending up in landfills. Fabrics for panels are available in recyclable Eco Intelligence® polyester, a new standard for sustainability. Completed orders are shipped directly to the job site, by-passing the installer's warehouse, eliminating double and even triple handling, and reducing our carbon footprint.

GREENGUARD® Certified

MAiSPACE is certified by the GREENGUARD Environmental Institute. This indicates that an approved laboratory has tested our products, and they meet the stringent GREENGUARD Emission Standards for indoor air quality.

MAiSPACE Products Contribute to LEED® Certification

LEED for Commercial Interiors is the green benchmark for the tenant improvement market. It is the recognized system for certifying high-performance green interiors that are healthy, productive places to work, less costly to operate and maintain and have a reduced environmental footprint. LEED for Commercial Interiors gives the power to make sustainable choices to tenants and designers who do not always have control over the entire building operations.*

*LEED Green Building Rating System.

Frame Technology

MORspace is technology friendly. Four-circuit, eight-wire power is available at the baseline or beltline. Incorporated into every panel frame are standards-based cable management pathways that accommodate up to 250 CAT 6e cables. Zone distribution and plug-and-play connectors provide unmatched flexibility in accommodating moves, adds and changes.

Wiring

MORspace incorporates state of the industry technology features.

1 Baseline to Beltline Power

2 Beltline to Beltline Power

3 Cable Management Trough

4 Interconnection Bracket

5 Plug-and-Play Connectors

6 Slack Cable Loops
